Web: <http://.abdulahad.tk>

Personal Summary

I took a bachelor degree in Computer Science & Engineering at City University, Bangladesh. I have done a few projects on Android. I have a solid programming foundation and have experience working in a Java-based environment, along with analytical, design and problem-solving capabilities. Excellent communication skills and being able to work alongside teams to define and refine new functionality are my strengths. I am looking for an ambitious company which will challenge my developer and problem-solving skills and allows me to continue to develop my knowledge and potential.

Work Experience

During university life, I worked as an android trainer for the students of my university and created the following android applications, helpful libraries. Full details are found on my website.

- **CU Assistant - App**
A prototype application for the university's authority to demonstrate different ideas and features for enhancing their service quality.
<http://abdulahad.tk/read.php?category=work&id=2>
- **SimPro - Library**
A simple, light-weight JavaScript library for creating & managing canvas based circular progress bar for the web.
<http://www.abdulahad.tk/simpro/>
- **Android Trainer**
I worked as a part-time android trainer for semester fall 2017 of my university.

Key Skills & Competencies

- Solid core Java development experience
- Ability to develop creative solutions for complex problems
- Web development: HTML, CSS, JavaScript & PHP
- Solid knowledge of relational databases
- Database: MySQL, SQLite
- Experience with application servers and containers as well as developing and integrating web services
